

# Email security is about 12% of healthcare IT security spend

Roughly one in eight security dollars goes to email, the channel behind most breaches.

## What we found

**The average healthcare email security budget represents 12% of total IT security spend.**

Twelve percent is a meaningful slice, but it is small against the risk. Email drives the majority of healthcare breaches, which makes every email security dollar worth scrutinizing for return.

## What it means for buyers

### Email carries outsized risk

85% of organizations had an email-related breach in the past year.

### Spend is not confidence

Only 23% are confident their email security is fully effective.

### Budgets are rising

69% plan to increase email security spend in the next year.

## WHY PAUBOX

# 4.9/5

average rating from 480+ verified G2 reviews by healthcare teams.

### More coverage per dollar

One platform covers inbound and outbound, not two line items.

### HITRUST certified

Annual third-party audit of every control.

### Encryption by default

Core protection without premium add-ons.
