

# Only 16% of healthcare organizations train quarterly or more often

Frequent, ongoing email security training is the exception, not the rule.

## What we found

**Only 16% of healthcare organizations provide quarterly or more frequent email security training.**

The overwhelming majority train less than quarterly, leaving long gaps between refreshers. Against phishing that evolves constantly, infrequent training is a thin defense.

## What it means for buyers

### Most train only annually

57% conduct email security training just once a year.

### Awareness varies widely

Staff phishing-identification rates differ sharply across organizations.

### The threat evolves weekly

70% report difficulty staying ahead of evolving email threats.

## WHY PAUBOX

# 4.9/5

average rating from 480+ verified G2 reviews by healthcare teams.

### Protection between trainings

Inbound Email Security covers the gaps a training calendar leaves open.

### Automated, always on

Threats are caught continuously, not on a schedule.

### HITRUST certified

Annual third-party audit of every control.
