

42% of healthcare organizations plan to invest in AI email security

AI-powered email defense is moving from interest to budget line for healthcare.

What we found

42% of healthcare organizations plan to invest in AI-powered email security within the next year.

The intent is growing because the threats are. Attackers already use AI to write and send phishing, and healthcare leaders know their defenses have to match it.

What it means for buyers

Attackers already use AI

64% have faced a confirmed or suspected AI-generated email attack.

Belief is near universal

89% call AI and ML critical for email threat detection.

Adoption still trails

Only 44% actually use AI or ML for threat detection today.

WHY PAUBOX

#1

on G2 for email encryption in healthcare, rated by verified users.

Detection beyond the filter

Inbound Email Security analyzes behavior and content, not just signatures.

One platform, one vendor

Advanced detection built in, not a separate AI tool to run.

HITRUST certified

Annual third-party audit of every control.
