

# 86% of healthcare IT leaders worry about their HIPAA compliance status

Compliance anxiety is the norm, and email is where most of the doubt lives.

## What we found

### 86% of healthcare IT leaders worry about their organization's HIPAA compliance status.

Worry this widespread points to a structural problem, not nerves. When leaders cannot trust their email platform to meet HIPAA on its own, the doubt never really goes away.

## What it means for buyers

### **Email drives the concern**

93% of leaders say HIPAA compliance matters when it comes to email.

### **The worry is widespread**

8 in 10 healthcare IT leaders admit they worry about HIPAA compliance.

### **Platforms fall short**

Most leaders lack confidence their current email platform meets HIPAA on its own.

## WHY PAUBOX

# #1

on G2 for email encryption in healthcare, rated by verified users.

### **Built for HIPAA**

Encryption, access controls, and audit logging are standard, not add-ons.

### **HITRUST certified**

Annual third-party audit of every control.

### **A business associate that signs a BAA**

Paubox stands behind the compliance of every email it handles.
